

Fecha de implementación y rondas adicionales
2006, 2012

Cobertura del paquete

Las advertencias sobre la salud deben cubrir el 75% del frente y el 90% del dorso del paquete. En total, el 82.5% del espacio del paquete está destinado a las advertencias sobre la salud.

Cronograma de rotación e historia

Australia ha elaborado dos rondas de etiquetas con advertencias sanitarias. El primer grupo de 14 advertencias sanitarias se utilizó entre 2006 y 2012. El segundo grupo de 14 advertencias sanitarias se implementó en 2012. Dos grupos de siete advertencias se rotan cada 12 meses.

Restricciones sobre la información engañosa

La Comisión Australiana de Competencia y Consumidores ha logrado el compromiso exigible judicialmente de las principales empresas tabacaleras para eliminar los términos engañosos tal como "ligero", "suave" y otros descriptores similares.

Notas especiales

En 2011 Australia se convirtió en el primer país del mundo en aprobar una ley que exigía embalajes sencillos y prohibía el uso de colores, logotipos u otras identificaciones de marca en los paquetes de tabaco. Se espera implementar la ley en diciembre de 2012. Antes de 2012, los paquetes de tabaco debían incluir advertencias sanitarias que cubrieran el 30% del frente y 90% del dorso del paquete (60% en total).
