

Date de mise en œuvre et lots supplémentaires
2006, 2012

Pourcentage du paquet couvert

Les mises en garde sanitaires doivent impérativement couvrir 75 % de l'avant et 90 % du dos des paquets. En tout, 82.5 % de la surface externe du paquet sont réservés aux mises en garde sanitaires.

Calendrier de rotation et historique

L'Australie a produit deux lots d'étiquettes de mise en garde sanitaires. Le premier lot de 14 mises en garde sanitaires a été utilisé de 2006 à 2012. Un deuxième lot de 14 mises en garde sanitaires a été mis en œuvre en 2012. Deux lots de sept mises en garde sont utilisés en alternance tous les 12 mois.

Restrictions relatives aux informations trompeuses

La Commission australienne de la concurrence et de la consommation a obtenu de la part des principaux fabricants de tabac des engagements ayant force exécutoire en faveur de la suppression des termes descriptifs comme « légères », « douces » ou autres.

Remarques particulières

En 2011, l'Australie est devenue le premier pays au monde à adopter une loi rendant le conditionnement neutre obligatoire et interdisant l'utilisation de couleurs, logos et autres signes distinctifs propres aux marques sur les emballages des produits du tabac. Cette loi devrait entrer en vigueur en décembre 2012. Avant 2012, les paquets de cigarettes devaient comporter des mises en garde sanitaires couvrant 30 % de la face avant et 90 % du dos de l'emballage, soit 60 % de la surface totale.
